

Climate Change Adaptation Plan

Regional Projects List

Wednesday, 29 March 2017

Organisation:

The Victorian State government has recently legislated the Victorian Climate Change Adaption Plan to drive action towards achieving a zero net emissions target by 2050.

The Department of Environment, Land, Water and Planning (DEWLP) is keen on identifying partners to help coordinate delivery of the plan.

CVGA member representatives and other partners feel there is value in proactively identifying a number of projects which could help deliver the state's targets in our region, as well as strong local economic development and social benefits. This list is intended to capture a few of your favourite ideas for consideration by Council representatives on the CVGA Board.
